16 Amp/220V Shore Power Products

For nearly 35 years, Marinco has offered boaters peace-of-mind with high quality shore power systems designed and manufactured to exceed the demands of the harsh marine environment.

MARINCO Shore Power Systems set the standard for high quality, innovative and safe marine electrical products. Our "locking style" design provides superior watertight closure, corrosion resistance, and safety versus pin and sleeve designs. This provides simple, effective and reliable AC power ship-to-shore connections in 230 Volt applications.

All of our products are backed by a five-year warranty.

16 Amp Cordset with Female Connector (blunt cut male end)

Male end blunt cut 12/3 (3.3mm²) cable 16 amp/220 volts 50 Hz
Same features as our PowerCord™ Marine Cordset, see pg. 13

15.24 m. 50PCMX

25 m. 82PCMX

7.62 m. 25PCMX

16 Amp PowerCord Plus® Cordset w/ Female Connector (blunt cut male end)

Male end blunt cut 12/3 (3.3mm²) cable 16 amp/220 volts 50 Hz
Same features as our PowerCord Plus® Marine Cordset, see pg. 12

15.24 m. 50SPPX

7.62 m. 25SPPX

16 Amp PowerCord Plus® Cordset w/ Female Connector and IEC 60309 Male Plug

Same features as our PowerCord Plus® Marine Cordset, see pg. 12, with 2.5mm² Harmonized cable and IEC 60309 Male plug (Plug Ratings: 2P+E [6H], IP44 splash resistance, 16A/230V). Also comes with 16A Watertight Connector Sealing Cap (199109) for CE compliance.

25 m. 25MSPPXP

20 m. 20MSPPXP

15 m. 15MSPPXP

10 m. 10MSPPXP

1 m. 1MSPPXP

CE Note: Marinco's electrical connectors are CE certified when installed as part of an assembled system consisting of the following components: (1) Female connector, (2) Weatherproof Cover with Threaded Ring, and (3) Watertight Connector Sealing Cap
